Speaker: Paul Brennan
VP, Content Operations
Shutterstock, Inc.

Paul Brennan: (00:00) We work with a worldwide network of over one million contributors to provide images, video and music for the Shutterstock marketplace.

(00:07) Our user-centered platform provides global network scale, and the two-sided network effect drives powerful engagement for both contributors and customers.

(00:16) We review the value and integrity of all content with proprietary AI technology and expert human mediation.

(00:23) And we continuously add value to our collections of over 300 million images and 18 million clips with new content that's creatively on trend and regionally relevant for a global marketplace.
